

LRM RESPONSIBILITIES

1. Serving as the Logistics advisor to OC senior management and coordinating logistical requirements for support of OC missions with senior management of OL and with other Federal agencies.
2. Planning and developing OC technical supply policy to include acquisition, handling, and deployment scenarios for maintaining the OC network.
3. Monitoring nominations and recommending assignments of all logistics careerists to OC positions worldwide. Participate in all personnel actions for logistics careerists assigned to OC.
4. Regularly visiting outlying OC installations to ensure logistical activities are properly administered in accordance with Agency and Federal laws and policies.
5. Providing guidance and direction for the maintenance of accountable property records. Serving as accountable property officer for all OC requirements for administrative equipment and supplies

STAT

PROBLEM AREA

STAT There is no formal focal point officer for the Office of Logistics (OL) in OC. This is in spite of the fact that there are OL careerists currently assigned to OC, and that a number of OC programs affecting logistics operations cross OC division lines. Accordingly, the LRM, who is considered by OL to be the Senior Logistics Officer in OC, has no formal authority or responsibility for any Logistics actions in OC.

RECOMMENDATION

Transfer the position of the Senior Logistics Officer to another component of OC, one where the advice and counsel of the incumbent can better serve the needs of OC.
